

ADMINISTRATIVE RULES OF MONTANA

37.114.1005 ISOLATION OF CASE TESTING AND QUARANTINE OF CONTACTS

- (1) Isolation must be imposed upon a case of active tuberculosis until the patient is considered not able to transmit tuberculosis as determined by the local health officer and the department's tuberculosis program.
- (2) The local health officer or department's tuberculosis program may require contacts of a case to be tested for tuberculosis infection and disease.
- (3) No quarantine of contacts is required unless the contact is symptomatic for active tuberculosis disease and has not completed a diagnostic evaluation to rule out active tuberculosis disease.
