

ADMINISTRATIVE RULES OF MONTANA

32.4.1313 MANAGEMENT OF CWD POSITIVE ALTERNATIVE LIVESTOCK CERVID HERDS

- (1) Disposition of cervid herds with a CWD confirmed diagnosis is as follows:
 - (a) Complete depopulation and post-mortem testing of the herd; or
 - (b) The entire herd shall be placed under quarantine for a period of five years since the last CWD positive case.
 - (i) The licensee must comply with CWD surveillance of the herd as outlined in ARM 32.4.1302.
 - (ii) The licensee shall meet with the state veterinarian and develop a herd plan within 30 days of the detection of CWD in the herd.
