

ADMINISTRATIVE RULES OF MONTANA

17.36.920 PERMITS

- (1) The reviewing authority shall administer a permit system for the construction, alteration, repair, and extension of wastewater treatment and disposal systems.
- (2) Permit applications must:
 - (a) identify the owner of the system, location of the system, and type of system to be installed;
 - (b) provide a justification for the type of system proposed;
 - (c) include a drawing of the lot layout with legend and scale; and
 - (d) show separation distances for the features indicated in ARM 17.36.918.
- (3) The reviewing authority shall maintain records of all permits.
- (4) For permits for new or increased sources, the reviewing authority shall show on the permit the method used for the non-significance determination made pursuant to ARM Title 17, chapter 30, subchapter 7.
- (5) For permits issued for replacement of wastewater treatment systems that do not meet minimum standards for subdivisions as set out in ARM Title 17, chapter 36, subchapter 3, the reviewing authority shall notify the owner that the design may limit the ability of the owner to subdivide the property.
