

ADMINISTRATIVE RULES OF MONTANA

36.11.230 SLASH RETENTION SITES SMA

- (1) For this SMA:
 - (a) Sufficient slash may be retained for the purposes of soil nutrient recycling, wildlife habitat and control of surface water runoff.
 - (b) This may include slash broadcast over the timber harvest unit and skid trails; concentrated slash in the form of slash filter windrows and other appropriate surface water runoff controls as defined by the Montana best management practices; and designated piles for wildlife habitat. Any such designated wildlife pile shall not be placed within 100 feet of a residence, property line, road with legal public access or active railroad right-of-way.
 - (c) The slash inspector shall recognize such beneficial and legitimate uses of slash and shall discount such slash from the general standard during the hazard assessment inspection.
