

ADMINISTRATIVE RULES OF MONTANA

37.114.561 PSITTACOSIS

- (1) For a case of Psittacosis, control measures outlined in Control of Communicable Diseases Manual must be applied.
- (2) The local health officer must inquire whether a bird epidemiologically linked to a case of psittacosis was obtained from an aviary, and if so, determine the location of the aviary and report it to the Montana State Veterinarian, Department of Livestock.
