

ADMINISTRATIVE RULES OF MONTANA

37.40.1446 HOME AND COMMUNITY-BASED SERVICES FOR ELDERLY AND PHYSICALLY DISABLED PERSONS: POST-ACUTE REHABILITATION SERVICES, REQUIREMENTS

- (1) Post-acute rehabilitation is the provision of therapeutic intervention to a consumer with brain injury or other related disability in a residential or nonresidential setting. Post-acute rehabilitation assists in reducing the dependency of the consumer and in facilitating the integration of the consumer into the community.
- (2) Post-acute rehabilitation may include:
 - (a) consultative clinical and therapeutic services as specified at ARM 37.40.1465;
 - (b) chemical dependency counseling as specified at ARM 37.40.1466;
 - (c) therapeutic recreational activities;
 - (d) nutrition services as specified in ARM 37.40.1476;
 - (e) nonmedical transportation as specified at ARM 37.40.1488; and
 - (f) counseling.
- (3) An entity providing post-acute rehabilitation services must be under the direction of an interdisciplinary team consisting of a licensed psychologist, a licensed neuropsychologist, a board-certified psychiatrist, therapists, and other appropriate support staff.
- (4) An entity providing post-acute rehabilitation services must be accredited or in the process of becoming accredited by the commission on accreditation of rehabilitation facilities (CARF) as a community reentry program for persons with brain injury.
